Location : Yaoundé, Cameroon

PROFILE

Engineer with a Master's degree (BAC+5) in Artificial Intelligence and Big Data, passionate about digital transformation and high-impact data valorization. Driven by strong ethical rigor and a keen sense of confidentiality, I design massive data flow architectures, Deep Learning models, and intelligent agents for business process optimization, anomaly detection, and strategic decision support.

EXPERIENCE

AI Engineer | Since August 2025

Cleeroute

— Development and deployment of autonomous AI agents and NLP solutions via LangChain, LangGraph, and FastAPI for applications in education and scientific research.

— Fine-tuning of open-weight models (LLMs) via the Hugging Face ecosystem and training acceleration with Unsloth.

— Evaluation, continuous monitoring, and response reliability assurance via LangSmith.

AI Engineer Intern | April – September 2025

BUNEC (National Civil Status Office)

— Design and training of Deep Learning models using PyTorch for automated anomaly and document fraud detection.

— Processing and securing sensitive databases under strict confidentiality standards.

Computer Science & Algorithms Teacher | 2024 – 2025

Collège Nana Bouba

— Structured teaching of algorithmic fundamentals and programming.

— Pedagogy, group facilitation, and simplifying technical concepts.

Data Analyst – BI & Modeling | July – October 2024

Hydro-Mekin

— Exploratory data analysis and modeling of complex industrial time series.

— Design of interactive dashboards using Power BI for performance tracking.

EDUCATION

- **Master in Artificial Intelligence & Big Data (BAC+5) | 2024 – 2025**
  Institut Universitaire des Grandes Écoles Européennes, Keyce informatique et intelligence artificielle – Yaoundé
- **Bachelor's Degree in Computer Science – Data Science Option | 2022 – 2023**
  Université de Yaoundé I
- **Scientific Baccalaureate (Series C) | 2019 – 2020**
  Collège Privé Laïc de la Paix – Foumban

SKILLS

- **AI, Machine Learning & NLP**
  Python, R, PyTorch, TensorFlow, Scikit-learn, LangChain, LlamaIndex, CrewAI, Deep Learning, Hugging Face, Unsloth, Fine-tuning.
  Predictive modeling, classification, Natural Language Processing, and open-weight LLM optimization.
- **Big Data, Massive Data & Cloud**
  PySpark, SQL (PostgreSQL), NoSQL (MongoDB), Azure Cloud.
  Large-scale data processing and orchestration, data pipeline implementation.
- **Business Intelligence & Industrialization**
  Power BI (DAX, Power Query), FastAPI, Django, Flask, Docker, REST API.
  Design of decision-support tools, monitoring dashboards, and deployment of robust APIs.
- **Project Management & Governance**
  Agile Methodologies (SCRUM), CAPM, ethics, and sensitive data security.

CERTIFICATES

- **AI Research Foundations** (Google DeepMind – In progress on Google skills)
- **Machine Learning Scientist** (DataCamp)
- **Associate Data Scientist** (DataCamp)

LANGUAGES

- **French :** Native
- **English :** Professional working proficiency
